

## SignalSlide® IHC Controls

The right controls to avoid false results\*

- Slides of formalin-fixed, paraffin-embedded cell pellets.
- Each slide contains a negative and a positive pellet for the target protein\*
- Custom control slides available upon request.

**SignalSlide® PTEN IHC Controls #8106:** paraffin embedded cell pellets, LNCaP (left) and NIH/3T3 (right) as negative and positive controls, respectively

Analysis using PTEN (D4.3) XP® Rabbit mAb #9188 on **SignalSlide® PTEN IHC Controls #8106** (paraffin-embedded LNCaP and NIH/3T3 cells)

\* Please refer to [http://www.cellsignal.com/technologies/ihc\\_controls.html](http://www.cellsignal.com/technologies/ihc_controls.html) to find out what controls to use with specific antibodies.
